

KMZ TRADE

KMZ Trade Minerals Catalog

Minerals portfolio with assay, origin and shipment documentation available for verified buyer requests.

Public buyer overview	2026 Edition
Analysis report available	English

Analysis report available

Every listed product has an analysis report and a relevant document pack available. Public PDFs show a safe summary only; detailed files are shared directly by WhatsApp or email.

Buyer information

The minerals overview presents available commodities, typical industrial uses and the documented sourcing process. Sensitive assay details are intentionally not fully published in the public PDF.

Analysis report available

Every listed product has an analysis report and a relevant document pack available. Public PDFs show a safe summary only; detailed files are shared directly by WhatsApp or email.

Product overview

Zircon Sand

ZrSiO₄

High-quality zircon sand for ceramic, foundry and refractory applications with documented analysis and reliable shipment handling.

Main component	Zircon sand
Quality basis	Analysis report available
Delivery form	Mineral sand
Packaging	Bulk or Big Bag
Documents	Analysis report, COA, origin and shipment papers available on request
Applications	Ceramics, foundry, refractory

Ilmenite

FeTiO₃

Titanium-iron mineral for industrial uses including pigments, titanium dioxide feedstock and welding electrode applications.

Main component	Ilmenite
Quality basis	Analysis report available
Delivery form	Ore / concentrate
Packaging	Bulk or Big Bag
Documents	Analysis report, COA, origin and shipment papers available on request
Applications	Pigments, TiO ₂ , welding

Manganese Ore

Mn

Manganese ore for steel, ferroalloys and battery precursor supply, available with analysis certificate, origin documents and agreed sizing.

Main component	Manganese ore
Quality basis	Analysis report available
Delivery form	Ore / concentrate
Packaging	Bulk or Big Bag
Documents	Analysis report, COA, origin and shipment papers available on request
Applications	Steel, alloys, battery precursors

Lead Ore

Pb

Lead ore and lead concentrate for metallurgy, battery production and downstream processing with clear analytical documentation.

Main component	Lead ore
Quality basis	Analysis report available
Delivery form	Ore / concentrate
Packaging	Bulk or Big Bag
Documents	Analysis report, COA, origin and shipment papers available on request
Applications	Batteries, metallurgy, industry

Zinc Ore

Zn

Zinc ore and zinc concentrate for galvanizing, alloy production and metal trading; specification, packaging and transport are aligned per project.

Main component	Zinc ore
Quality basis	Analysis report available
Delivery form	Ore / concentrate
Packaging	Bulk or Big Bag
Documents	Analysis report, COA, origin and shipment papers available on request
Applications	Galvanizing, alloys, metal trading

Monazite Ore

(Ce,La,Nd,Th)PO₄

Monazite concentrate containing rare earth elements for specialized industrial buyers, supplied with verified documentation.

Main component	Monazite
Quality basis	Analysis report available
Delivery form	Mineral sand / concentrate
Packaging	Bulk or Big Bag
Documents	Analysis report, COA, origin and shipment papers available on request
Applications	Rare earths, technology, industry

Columbite

(Fe,Mn)Nb₂O₆

Niobium-tantalum bearing ore for specialty metals, electronic components and high-strength alloy applications.

Main component	Columbite
Quality basis	Analysis report available
Delivery form	Ore / concentrate
Packaging	Bulk or Big Bag
Documents	Analysis report, COA, origin and shipment papers available on request
Applications	Electronics, superalloys, niobium

Zirconium Sand

ZrSiO₄

Fine zirconium mineral sand for ceramic, foundry and refractory production, suited to buyers with defined quality parameters.

Main component	Zirconium sand
Quality basis	Analysis report available
Delivery form	Mineral sand
Packaging	Bulk or Big Bag
Documents	Analysis report, COA, origin and shipment papers available on request
Applications	Ceramics, foundry, refractory
