

KMZ TRADE

Minerals Catalog

Industrial minerals with public technical summaries and controlled disclosure.

PUBLIC SUMMARY / REDACTED CATALOG

Manganese, lead, zinc, zirconium/zircon sand, monazite, columbite and ilmenite.

Sensitive report identifiers, exact sample details and location information are intentionally hidden. Complete documents can be reviewed during qualified buyer due diligence.

Mn

Manganese Ore / Manganez Cevheri

Metallurgy, steel and ferroalloy buyers use manganese ore as a critical alloying input. KMZ Trade presents this material with a concise public analysis summary and releases full COA details only after buyer verification.

Controlled disclosure model

Public technical summary

Client / supplier

Full details are released only to verified buyers.

Mn 52.00 wt%

Fe 11.00 wt%

SiO₂ 13.42 wt%

Al₂O₃ 5.00 wt%

CaO 2.00 wt%

MgO 1.50 wt%

P₂O₅ 0.15 wt%

Applications

Steel, ferroalloys, battery precursor supply

Packaging / commercial handling

Bulk vessel, containerized bulk or big bag by agreement

Pb

Lead Ore / Kursun Cevheri

Lead ore and galena concentrate for metallurgical processing, battery-sector feedstock and industrial smelting routes. Public values are limited to headline composition; trace elements and full report data are supplied under controlled buyer review.

Controlled disclosure model

Public technical summary

Client / supplier

Full details are released only to verified buyers.

Pb 70.00 wt%

Zn 2.00 wt%

Fe 3.50 wt%

S 12.00 wt%

SiO₂ 4.00 wt%

Al₂O₃ 1.50 wt%

CaO 1.20 wt%

MgO 0.80 wt%

Applications

Metallurgy, batteries, downstream lead processing

Packaging / commercial handling

Bulk or big bag, moisture and sizing by lot

Zn

Zinc Ore / Cinko Cevheri

Zinc ore/concentrate for galvanizing, alloys and metal trading. KMZ Trade supports purchasing teams with a public specification sheet first, then detailed COA and shipment documents once the commercial process is qualified.

Controlled disclosure model

Public technical summary

Client / supplier

Full details are released only to verified buyers.

Zn 50.17 wt%

Pb 3.23 wt%

Fe 6.20 wt%

S as sulfide 11.10 wt%

SiO₂ 4.35 wt%

Al₂O₃ 2.15 wt%

CaO 1.90 wt%

Applications

Galvanizing, alloys, zinc smelting and trading

Packaging / commercial handling

Bulk or big bag, container loading possible

ZrSiO4

Zirconium Sand / Zircon Sand

Zirconium mineral sand for ceramics, foundry and refractory applications. The public sheet shows buyer-relevant headline values while report identity, sample codes and origin details remain redacted for controlled disclosure.

Controlled disclosure model	
Public technical summary	
Client / supplier	Full details are released only to verified buyers.
ZrO2	64.41 wt%
HfO2	1.59 wt%
Total Zr/HfO2	66.00 wt%
SiO2	20.00 wt%
Fe2O3	<0.76 wt%
TiO2	<0.58 wt%

Applications

Ceramics, foundry, refractory production

Packaging / commercial handling

Mineral sand in bulk or big bag

(Ce,La,Nd,Th)PO₄

Monazite Ore / Monazite Cevheri

Rare-earth-bearing monazite concentrate for specialized industrial buyers. Because this product can involve sensitive handling and regulatory review, public documents remain intentionally limited.

Controlled disclosure model

Public technical summary

Client / supplier

Full details are released only to verified buyers.

Rare earth content

Analysis on request

Moisture

By lot

Sizing

By buyer requirement

Documentation

COA and origin file after verification

Applications

Rare earths, specialty processing, technology supply chains

Packaging / commercial handling

Project-based packaging and documentation

Columbite

Niobium-tantalum bearing ore for specialty metals and high-strength alloy applications. Detailed Nb/Ta ratios, impurity profile and trace values are handled through buyer verification.

Controlled disclosure model	
Public technical summary	Full details are released only to verified buyers.
Client / supplier	
Nb/Ta values	Analysis on request
Form	Ore / concentrate
Moisture	By lot
Documents	COA, origin and export file

Applications

Specialty metals, electronics, superalloys

Packaging / commercial handling

Bulk, drums or big bags by project

FeTiO3

Ilmenite

Titanium-iron mineral for pigment, titanium feedstock and welding-related applications. Public information is kept commercial and technical without exposing supplier-level details.

Controlled disclosure model	
Public technical summary	Full details are released only to verified buyers.
Client / supplier	
TiO2 / Fe profile	Analysis on request
Form	Ore / concentrate
Moisture	By lot
Documents	COA and shipment file

Applications

Pigments, TiO2 feedstock, welding electrodes

Packaging / commercial handling

Bulk or big bag by agreement

Buyer Process

How KMZ Trade handles inquiries

1. RFQ

Product, quantity, destination port, Incoterm and target specification.

2. Qualification

Buyer and order profile reviewed before detailed documents are shared.

3. Documentation

Public summary first; complete COA, origin and shipment file after verification.

4. Offer

Price, packaging, loading window, payment terms and delivery route are aligned.

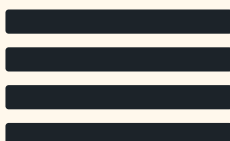

Controlled disclosure model

Report no.

Client / supplier

Sample ID

Exact origin

Full details are released only to verified buyers.
